

## STATE FISCAL YEAR 2013-14/2014-15 TRANSPORTATION CAPITAL PROGRAM

### Intent

The State Fiscal Year (SFY) 2013-14 Budget authorizes the first year of a two-year Department of Transportation Capital Program, intended to attract and create private sector jobs; to leverage State resources to generate billions in new construction and economic growth; to manage our infrastructure assets so that New York remains competitive and safe; and to mitigate impacts that future extreme weather events may have on New Yorkers and the State's economy. In furtherance of these goals, the Governor of the State of New York, the Temporary President of the Senate, and the Speaker of the Assembly enter into this agreement to present information to the people of New York State on the plan for the two-year SFY 2013-14/SFY 2014-15 State Transportation program.

### (1) State Highway and Bridge Program

The Department of Transportation (Department) SFY 2013-14/SFY 2014-15 State Highway and Bridge Program is attached as Appendix A and Appendix B. Appendix A contains construction projects in the core program financed and obligated under the federally mandated planning and programming process and Appendix B contains construction projects in the core program financed and obligated under the State planning and programming process.

It is the intent of the parties to this agreement to adhere to this program as closely as possible. The parties to this agreement, however, understand that the Capital Program administered by the Commissioner of Transportation may require adjustments to address emergencies, environmental conditions, new federal mandates or to address other unforeseen conditions as a result of the design and engineering process that may impact project costs, scopes, and schedules during project development and implementation. The projects contained in Appendix A and Appendix B (the Core Program) constitute the program of projects that will be advanced by the Department during SFY 2013-14 and SFY 2014-15. A summary by region appears below. Encumbrance of the costs of these projects will be limited by the availability of SFY 2013-14 and SFY 2014-15 appropriations for this purpose.

- **Hudson Valley Region** - \$268 million for the counties of Westchester, Rockland, Putnam, Dutchess, Columbia, Orange and Ulster. Of this amount, \$97 million is subject to this agreement.
- **Long Island Region** - \$391 million for the counties of Nassau and Suffolk. Of this amount, \$56 million is subject to this agreement.
- **New York City Region** - \$1,260 million for the counties of Richmond, Kings, Queens, New York and Bronx. Of this amount, \$151 million is subject to this agreement.
- **Upstate Region** - \$1,421 million for all counties in New York State not specifically included in the regions outlined above. Of this amount, \$248 million is subject to this agreement.

Each of the parties recognizes that the selection of projects utilizing federal funds, as a condition of the State accepting federal aid, must follow federal planning and programming procedures. In

metropolitan areas, federally aided projects must be approved by a Metropolitan Planning Organization (MPO). In non-metropolitan areas, federally aided projects must be selected in consultation with local officials.

## **(2) State Highway and Bridge Project Acceleration Initiative**

The undersigned agree that \$155 million will be provided in SFY 2013-14 and \$155 million in SFY 2014-15 to accelerate Department projects of regional and community importance into SFY 2013-14 and SFY 2014-15. The Department shall develop a list of candidate projects and engineering initiatives for acceleration consistent with the Department's planning and engineering processes. Such list shall be made in good faith in order to address transportation-related concerns statewide, and shall be provided, no later than 45 days after enactment of the respective year's budget, to the Speaker of the Assembly and Temporary President of the Senate so that each may designate, with the Commissioner of Transportation, projects to be accelerated.

## **(3) State Highway and Bridge Program Reporting**

The Department will issue the following reports to keep the Governor, the Temporary President of the Senate, the Speaker of the Assembly, and the chairs of the transportation and fiscal committees of the legislature fully informed on the progress of delivering the State Highway and Bridge program.

- A. **Capital Program Letting and Implementation Reports** – On or before June 1, 2013 and 2014, the Department shall provide a report in electronic format for SFY 2013-14 and SFY 2014-15, respectively, that details the Department's on-State system capital projects and off-State system local capital projects, as defined in subdivision two-a of section two of the State Finance Law, planned for the forthcoming fiscal year including projects receiving funds pursuant to New York Works. Such report shall detail, by Memorandum of Understanding (MOU) region, projects which are expected to be advertised for public bid in the respective State fiscal year, including estimated letting dates. This report will include a project description, proposed month of letting, a project identification number, and project cost estimates. Such capital report shall present project letting details by MOU region; within region by funding source; within funding source by capital program category (pavement preservation, pavement reconstruction, bridge preservation, bridge rehabilitation or replacement, safety, mobility, and other); and within capital program category by project phase (scoping, preliminary engineering, right of way, final design and construction). After completion of each quarter, the Department will issue a report at the same level of detail as provided above, including the actual letting dates and contract amounts for each project. The report shall also compare changes in planned construction lettings with actual project lettings, changes in project costs of more than 25 percent for projects in excess of 15 million dollars and the contributing factors for such project cost changes, changes in project letting schedules of more than twelve months and contributing factors for such changes in letting schedules, and the estimated number of jobs created by each project. The aforementioned summative reports shall also be available in electronic Excel formats or as requested by the Legislature.
- B. **Capital Program Accomplishments Report** - The Department shall annually provide, on or before July 15, in electronic format, an accomplishment report for the prior year detailing the

amount of funding obligated for major capital program categories including: pavement preservation, pavement reconstruction, bridge preservation, bridge rehabilitation or replacement, safety, and mobility. Such capital report shall present details by MOU region; within region by funding source; within funding source by capital program category (pavement preservation, pavement reconstruction, bridge preservation, bridge rehabilitation or replacement, safety, and mobility); and within capital program category by project phase (scoping, preliminary engineering, right of way, final design and construction). Accomplishment report regional details as defined above shall be available in electronic Excel formats or as requested by the Legislature.

- C. **Highway Pavement and Bridge Condition Reports** - The Department shall annually provide, on or before July 15, in electronic format, a report that details the conditions of State highway pavement by region and statewide condition goals for pavement, and the condition of State and local bridges by county and the statewide condition goals for bridge conditions.

**(4) Public Transportation Capital Program for Downstate Suburban and Upstate Transit Systems**

The undersigned agree that \$5 million in additional capital investment will be provided in SFY 2013-14 for Downstate Suburban and Upstate transit systems. Such funds shall be distributed in accordance with Appendix C.

It is further agreed that funds for a similar purpose will be provided in SFY 2014-15, to be allocated from a \$25 million planned reserve for public transportation capital, freight rail capital, aviation capital, and other transportation capital programs. Final allocations from this reserve will be determined by the undersigned in the context of the SFY 2014-15 budget enactment.

**(5) Freight Rail Capital Program**

The undersigned agree that \$10 million in additional capital investment will be provided in SFY 2013-14 for freight rail purposes. Of this amount, up to \$3 million will be provided to the Metropolitan Transportation Authority for costs associated with implementing a one year pilot program to upgrade diesel train engines owned by the Long Island Rail Road to improve emissions standards. The process and schedule for distribution of these funds (the full \$10 million) shall be proposed in a plan submitted by the Commissioner of Transportation to the undersigned no later than 10 days after enactment of the SFY 2013-14 budget.

It is further agreed that funds for a similar purpose will be provided in SFY 2014-15, to be allocated from a \$25 million planned reserve for public transportation capital, freight rail capital, aviation capital, and other transportation capital programs. Final allocations from this reserve will be determined by the undersigned in the context of the SFY 2014-15 budget enactment.

**(6) Aviation Capital Program**

The undersigned agree that \$10 million in additional capital investment will be provided in SFY 2013-14 for aviation capital purposes. Such funds shall be used first to provide the State share of any improvements undertaken with assistance from the Federal Aviation Administration's Airport Improvement Program. To the extent that funds remain after the State share is provided, such funds shall be used for the purposes of section 14-1 of the transportation law. The process and schedule for distribution of these funds shall be proposed in a plan submitted by the Commissioner of Transportation to the undersigned no later than 10 days after enactment of the SFY 2013-14 budget.

It is further agreed that funds for a similar purpose will be provided in SFY 2014-15, to be allocated from a \$25 million planned reserve for public transportation capital, freight rail capital, aviation capital, and other transportation capital programs. Final allocations from this reserve will be determined by the undersigned in the context of the SFY 2014-15 budget enactment.

**(7) SFY 2015-16 through SFY 2019-20 Transportation Capital Program**

Furthermore, it is the intent of the undersigned that the Department shall recommend and submit a five-year capital program for the State Highway and Bridge Program and other transportation modes for SFY 2015-16 through SFY 2019-20 to the Governor, Speaker of the Assembly and the Temporary President of the Senate.

This agreement is entered into this 24<sup>th</sup> day of March 2013 by:
